EMPOWERING SUPERHEROES™

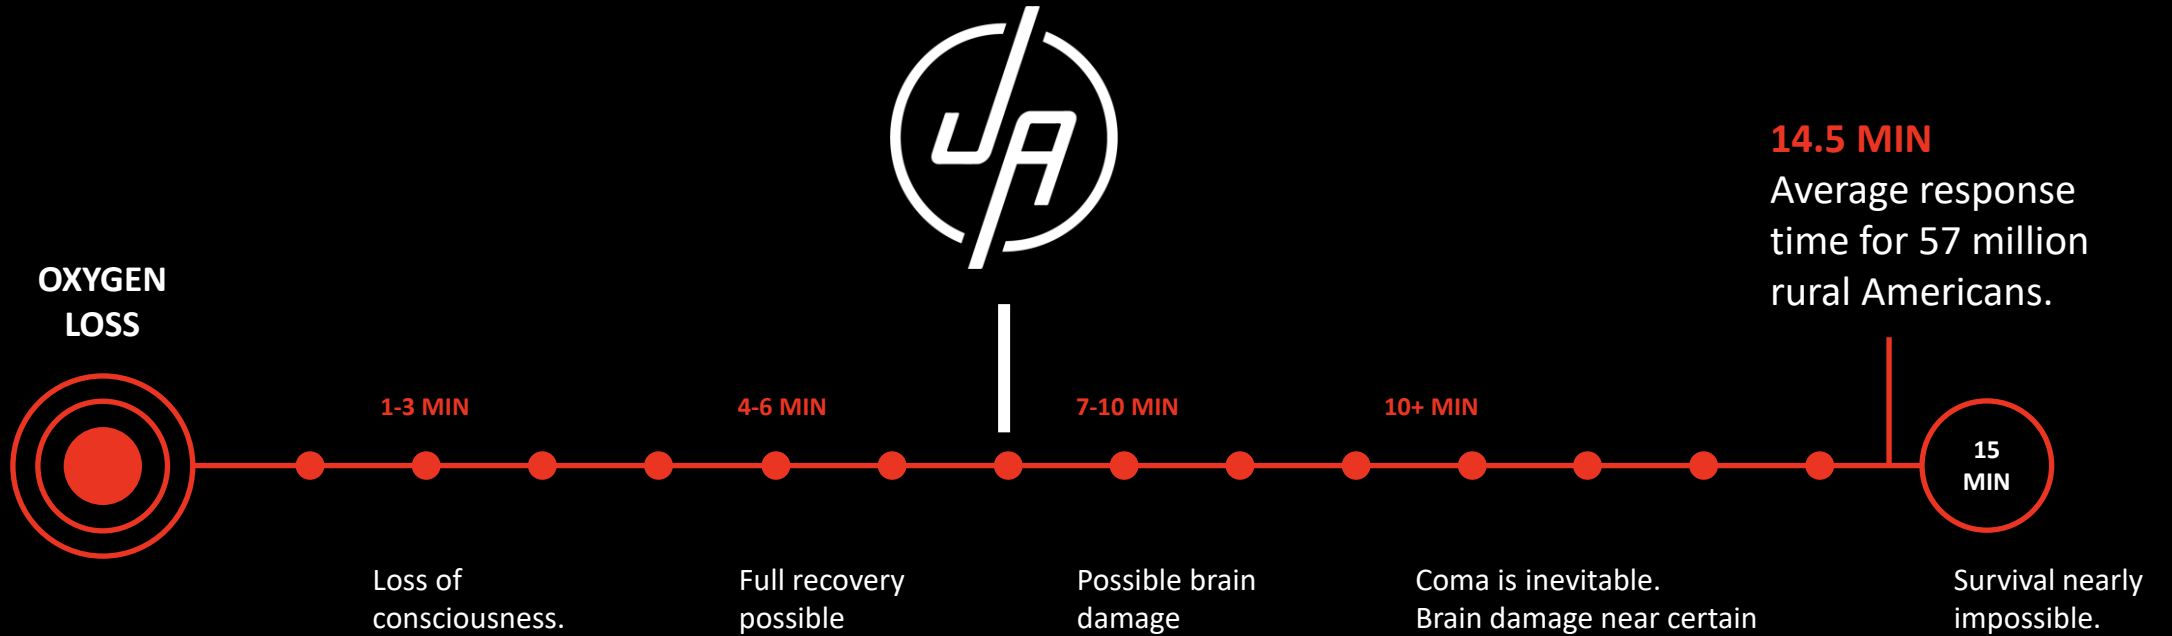

Rural emergency medical systems are struggling

Ambulance-based response can't achieve 8-minute standard of care in rural areas...

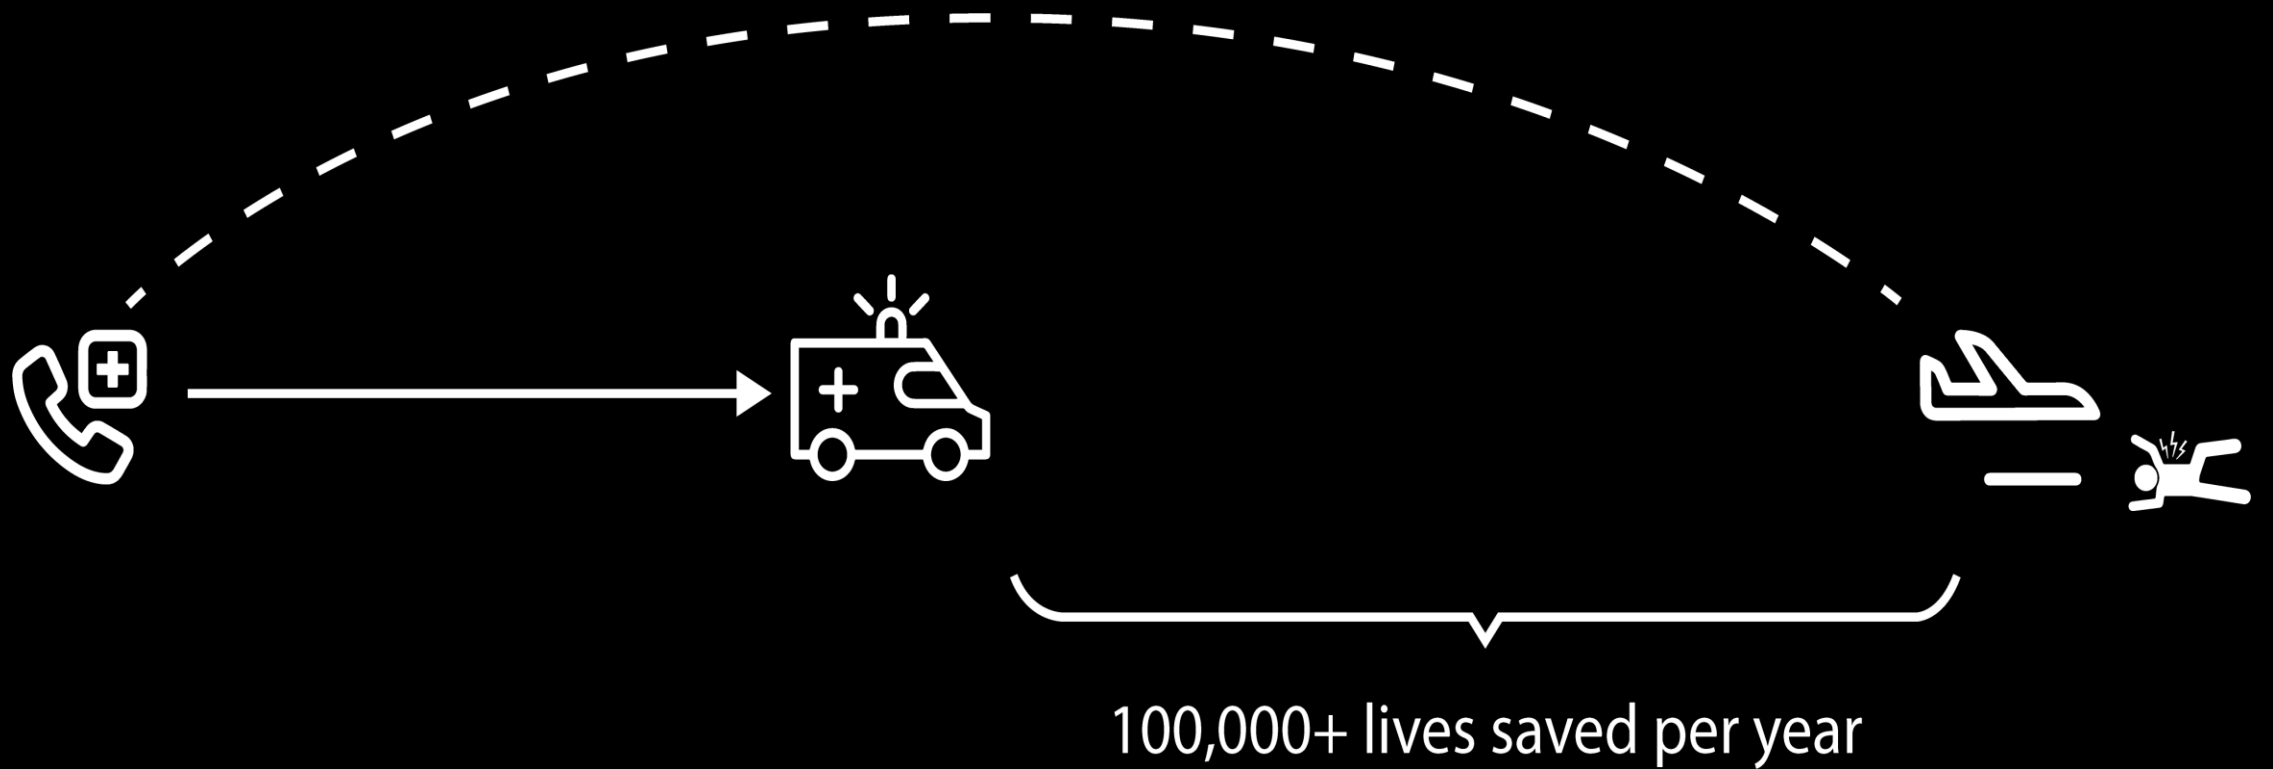

Source: National Rural Health Association Policy Brief: EMS Services in Rural America: Challenges and Opportunities. 2018

A few minutes is the difference between life and death...

These are the most valuable minutes of the patient's life.

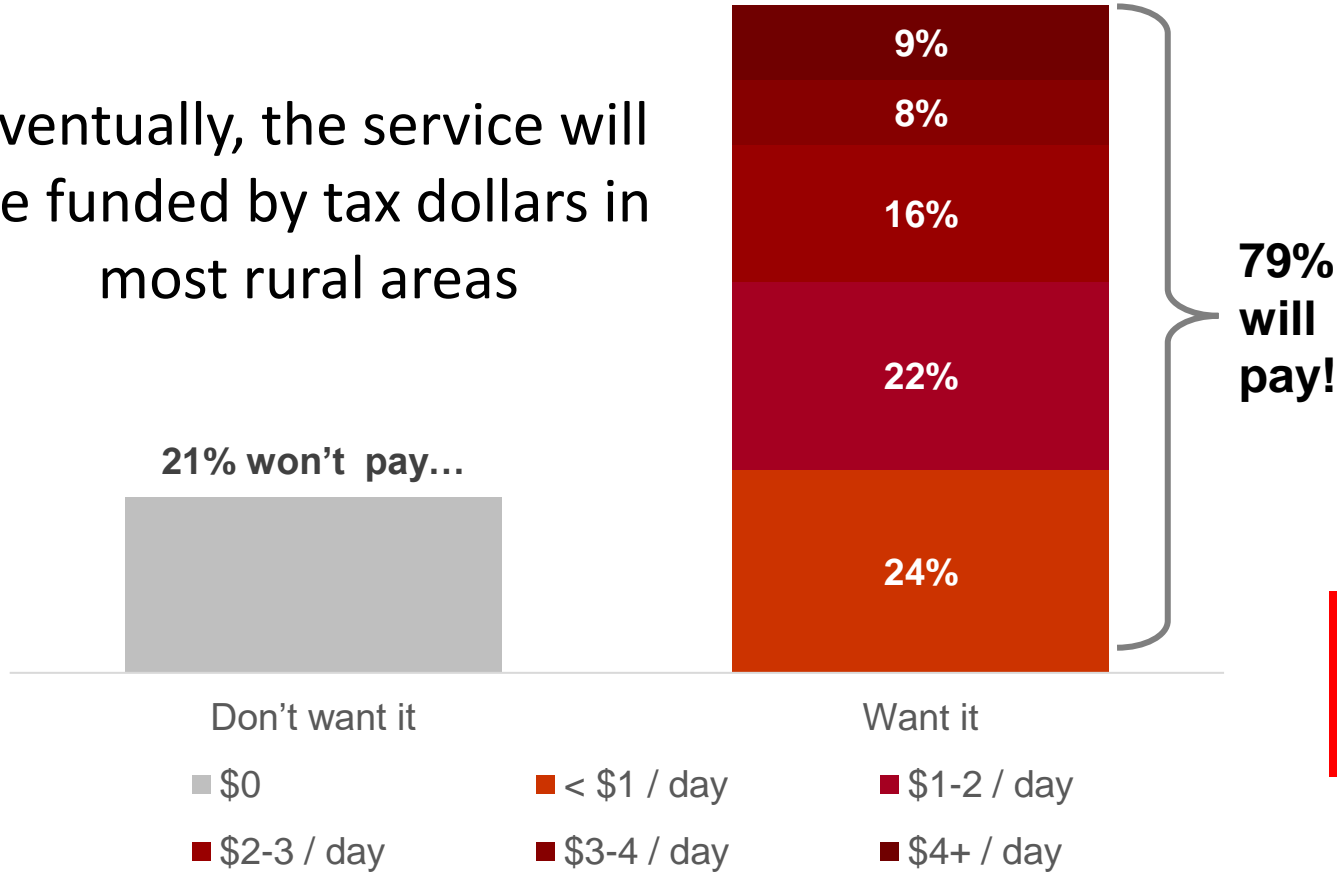

Jump Aero enables *faster emergency response...*

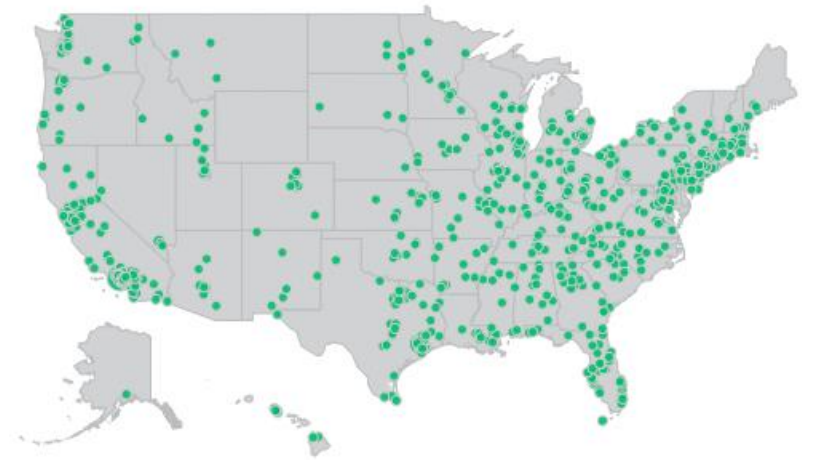

Value of Service in Rural United States

Eventually, the service will be funded by tax dollars in most rural areas

N = 532 → Margin of error +/- 4.3%

@ \$2/day subscription
\$13 billion/yr new domestic market

JA1 Pulse

The *fastest* form of sustainable personal transportation...

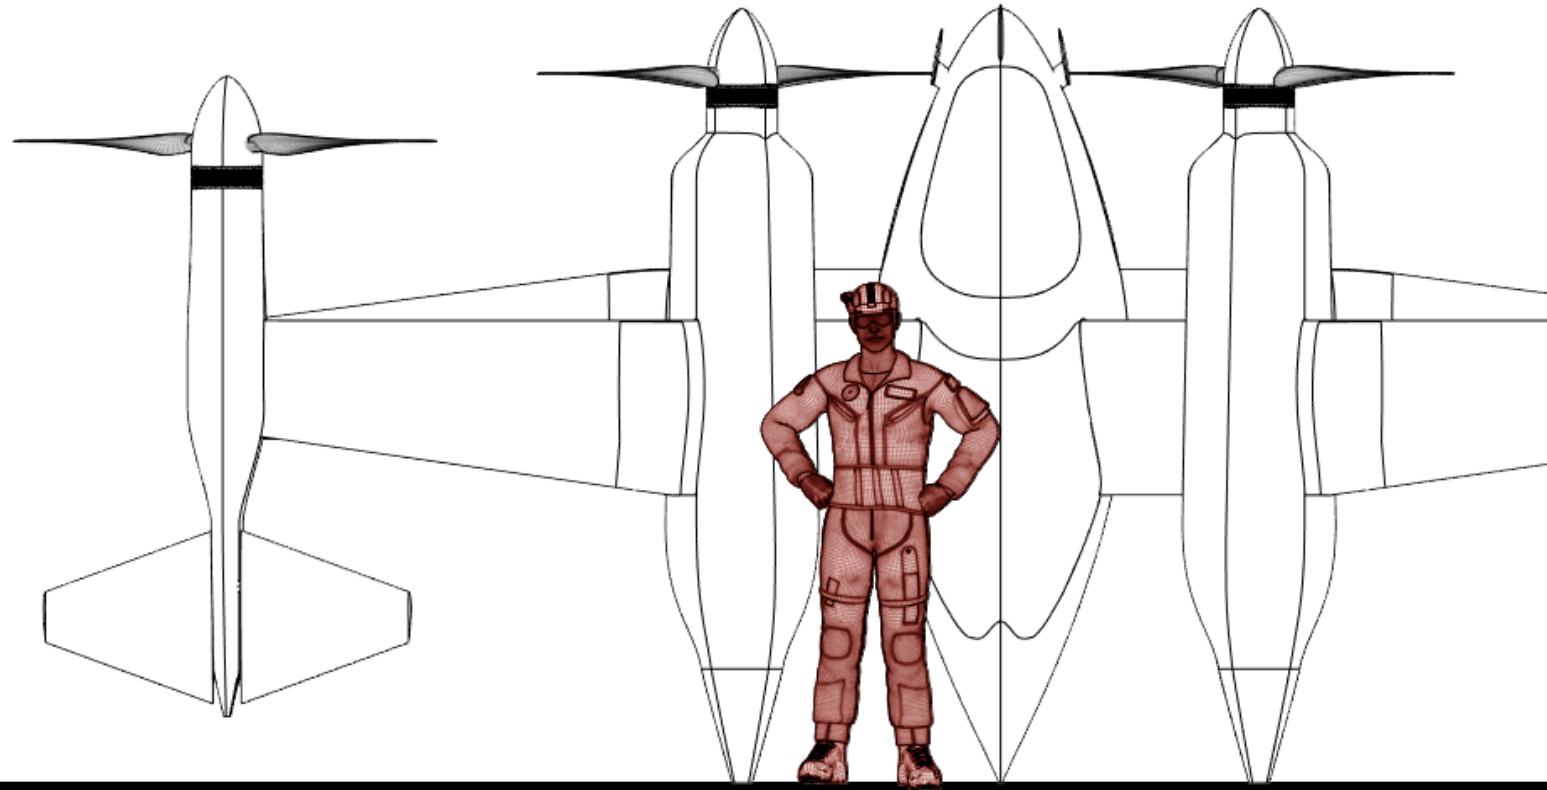

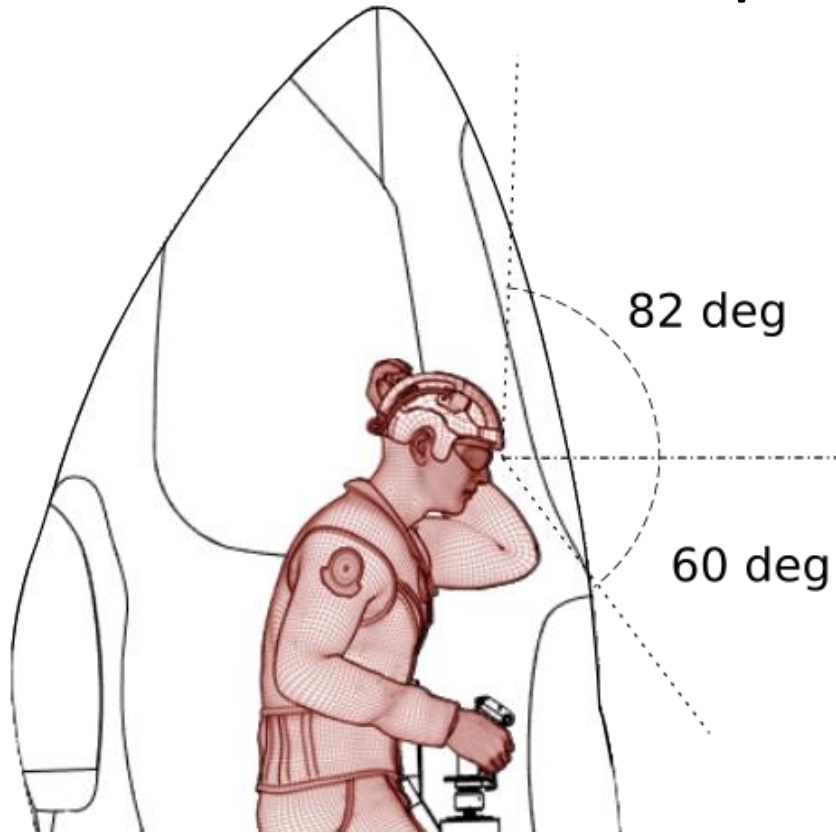

Unmatched speed...

Outstanding visibility to land in unimproved areas...

Props above head-height for operational safety...

Transportable by trailer without disassembly.

JA1 Pulse

325 lbs of payload (pilot plus life saving equipment)

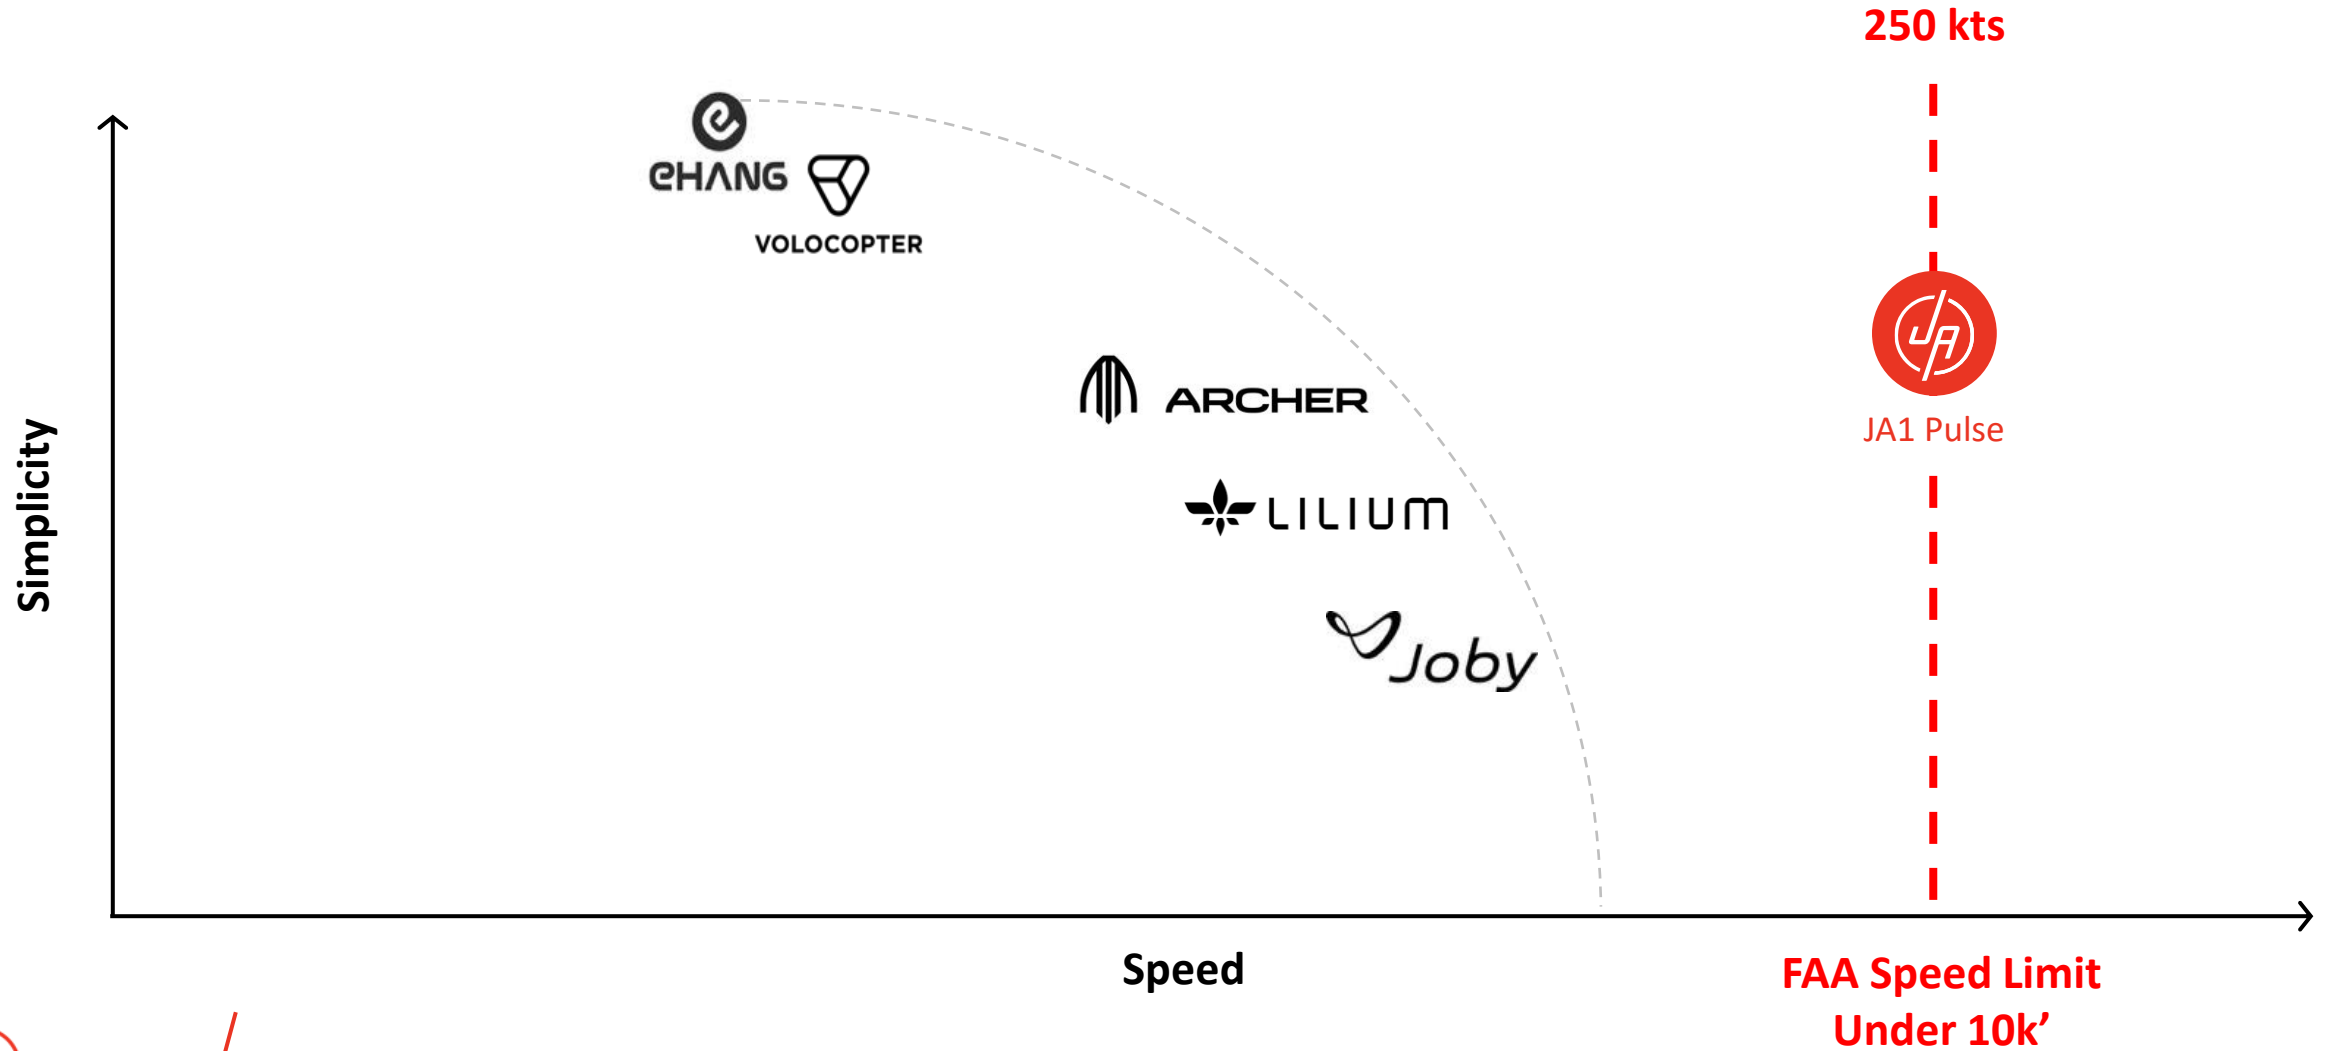

250 kts!

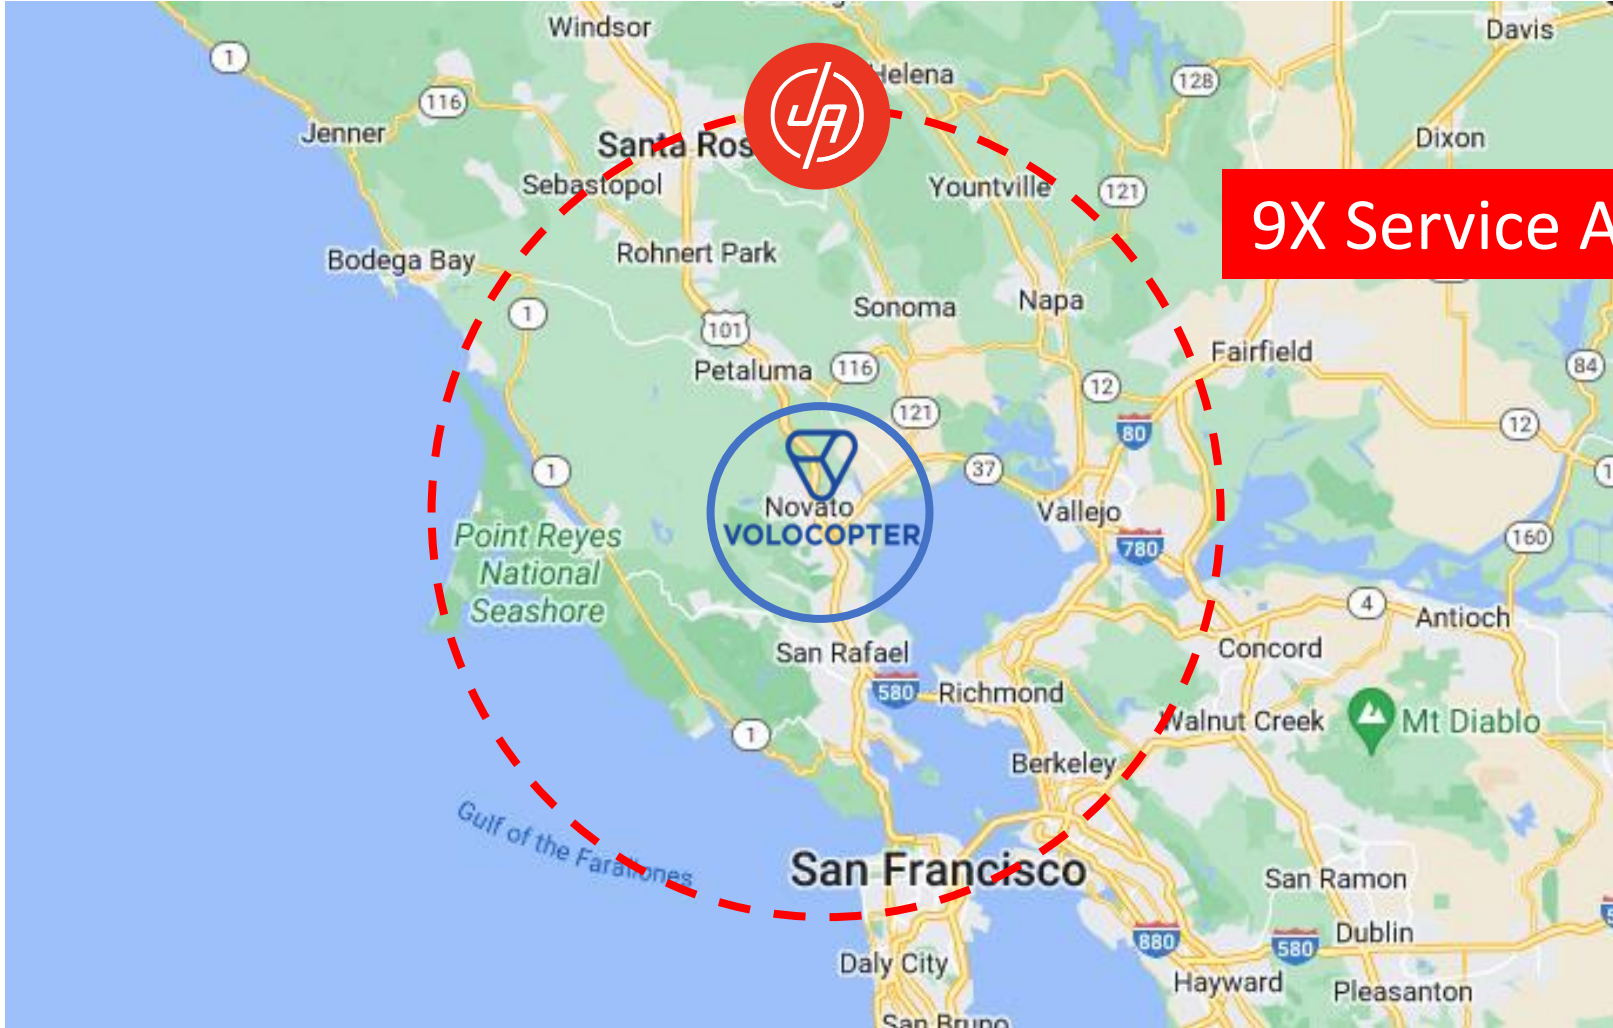

Extensive parts commonality to lower costs

Unlike other eVTOLs, the JA1 Pulse is optimized for speed...

8-minute response areas:

9X Service Area!

Jump Aero is please to announce our launch EMS customer:

FALCK

Consistent Revenue Growth

(in Thousands \$000USD)

U.S. AIR FORCE

5 Contract Awards
\$3.6 million

AGILITY PRIME

■ Actual ■ Unrealized

The path forward

- USAF TACFI → POC ready to fly in H2 2025
- Expect additional design iteration between POC and Production
- Product to market as soon as it is safe
 - Certification Basis drafted for Level 1 project
 - MOSAIC NPRM could enable JA1 Pulse to be LSA
- More exciting announcements to come later this fall!
